49	I	8:15 AM	11:30 AM	Twin Creeks Science and Education Center off Cherokee Orchard Road (GG)	Become a GSMNP Citizen Scientist	Tennessee and North Carolina are home to approximately 1.5 million dried plant specimens. To make a permanent record of a plant species location and genetic information, a plant is collected, pressed, mounted on a paper sheet, and stored in a herbarium. To make each plant's information available globally, a local and international digitizing effort is underway. This program introduces you to the Park's natural history collections which have not been digitized until now. Using the Park's plant specimens, you will photograph the plant sheet, record the plant's location information, then upload the data into an international biodiversity database. Your data entry will be available immediately to researchers and conservation workers around the world. We'll show you ways to engage in these efforts from your home. No experience necessary.
